Marketing Management concentration	Graduation Rate	67% (2/3)

**Indicators Used**

<b>INDICATOR</b>	<b>DESCRIPTION AND HOW IT WAS CALCULATED</b>
Five year graduation rate	The cohort used was the fall 2013 first-time full-time freshmen. Students included in the original cohort are those enrolled in any of the majors under Business Division (even if they later transferred out of the division), and also those who didn't initially enroll in the division but later switch majors into the

	division (based on their major in fall 2017). The five year graduation rate was calculated using the original cohort above to see how many graduated with a Business division degree by August 31, 2018.
